DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lane in view of Urquhart et al.

Lane discloses the invention substantially as claimed except for a slot at the wide end. As best understood of the specification, this "wide end" slot is for threading of the paper sheet. In that regard, Urquhart et al teaches an alternative means of threading the sheet from a roll wherein the device include a wide end slot (near 12 in Fig. 1) and a narrow end (at 14 in Fig. 1) for the purpose of threading the sheet from the wide end down to the narrow end. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the device of Lane with the slot at the wide end as taught and suggested by Urquhart et al in order to facilitate threading of the sheet in an alternative manner. Based upon the modification above, it would also have been obvious to the ordinary artisan to place the "narrow end bar" (which is for the purpose of facilitating the tearing action of the sheet) towards the narrow end depending on the optimum placement for the user, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.
